

# Proven Results, Time Tested Performance

The results depicted here are from actual field testing. Results will vary from job to job and are dependant on system flow rate, raw water radon concentration and filter air constrictions.

The tables and charts shown support the Bubble-Up performance to be in the high 99% removal range.

GPM	RAW,pCi/l	FILTERED	EFF, %
5	28661	221	99.23
5	35815	358	99.00
5	39650	244	99.38
5	48193	370	99.23
5	72655	344	99.53
5	92451	389	99.58
5	123798	1218	99.02
5	458261	2260	99.51

GPM	RAW,pCi/l	FILTERED	EFF, %
3	458261	812	99.82
3	367897	1588	99.57
6	103222	985	99.05
6	127450	805	99.37
7	560000	1600	99.71
7.5	458261	3500	99.24
8	31000	190	99.39
