June, 2007

Dear REPCO Customer:

For years, we have maintained in our fleet two winch trucks. These trucks were available for rent to licensed installing tradesmen to service their customers for water well pumps. Our policy has always been that these trucks were un-lettered and available as tools for our customers only.

Due to the changing water system industry in New England and the decrease in the rental of our winch trucks prompted us to evaluate the continued use of them.

An era has come to an end!

Effective September 30, 2007 we will no longer have winch trucks in our rental fleet. We believe that this will be a seamless transition; due to the infrequent rental we have had over the last several years.

We trust that this will not inconvenience anyone and if a need for a rental is required please give us a call as we have a list of available contractors who have a winch truck available for rental.

It has always been and will continue to be our philosophy to serve you to the best of our ability. Thank you for your continued trust and loyalty.

Sincerely,
R.E. Prescott Co., Inc.
